Basis enterprise application managed services

Application upgrade services

Global technical support (24/7 single pane of glass monitoring)

Mission-critical ERP applications are now essential to most businesses. However, the Maintenance and upkeep of these applications can be time-consuming, complex, and cost-intensive. To cope with enterprise demands and successfully maintain SAP business environment, Pi engages with enterprises in an integrated manner to streamline their business processes. The transformation leads to business agility and a lower total cost of ownership, improve governance, and prescribe compliance.

Remove cost as a barrier
One Cost One Invoice. This includes software, hardware, and integrated support – all delivered to enterprises as a service through a well-ap-pointed recurring OPEX model.

Deliver an end-to-end experience
From deployment of application and underlying environment, to ongoing maintenance, and updates, enabling enterprises to take advantage of our best-in class infrastructure and processes delivering user-experience and business excellence.
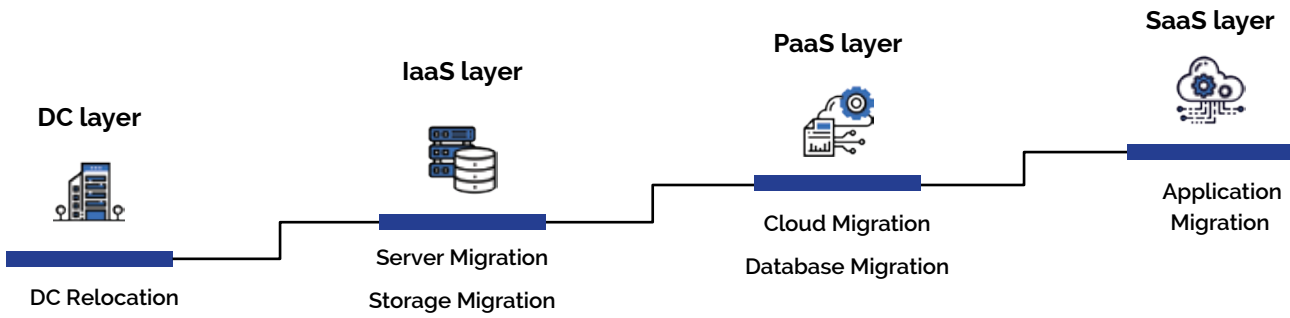

Building long-term relationships
Trusted advisor to enterprises handholding their SAP landscape to match changing their dynamic business needs. Safe harbour for enterprises to park their business-critical SAP and non-SAP workloads.
